# Key Changes / Improvements

- We revised the definition “Independent Surveillance”. It no longer conforms to the definition in the IAQG dictionary and will require a change to the dictionary
- Additional clarity concerning final product inspection is provided to section 4.1
- For additional clarity, section 5 (d) provides examples of operator and process oversight
- For additional clarity, section 6 (a) expands the methods of evaluating process capability and stability. It also provides option of suspending process until stability is restored

# Key Changes / Improvements

- For additional clarity, section 6.1.2 (a) provides examples of risk mitigation for critical processes
- Section 6.2.1 (b) Training – Now includes the utilization of acceptance authority media as a personal warranty of compliance and conformity to the training program
- Section 6.2.1 (e) Now includes the use of acceptance authority media as a requirement step-in the implementation of an operator self-verification program

# Deployment Support

- Team has determined none is required

# Next Steps

- Coordination draft for distribution
- Comment inputs

# SCMH

- Coordination with PSCI to revise SCMH Section 3.15 Operator Self Verification
